

## RR5050 GREY REMOVER

Restoring degraded woods

**Fields of use:** The RR5050 can be applied on surfaces such as, greying wooden items like floors, windows, garden furniture, cladding, fences, and beams.

**Product information:** Rio Verde RR5050 lightens and creates a regeneration to greying and oxidized wood. It removes grey from any specie of wood and rejuvenates the original appearance. This product is ideal for exotic and coniferous woods. Soft-gel formulation for application, both flat and vertical.

### Instructions for use:

Before using the product, shake vigorously for the best outcome. Remove any traces of paint from the surface so the product can treat the wood. Make sure the wood is dry before the application process. Apply within a brush until forming a layer of a few millimetres. Rub with a brush with nylon or sorghum bristles, it is advised not to use brushes with metallic qualities. Leave for about 10-15 minutes. Rinse thoroughly with water, cleaning with the brush. Alternatively, it is possible to wash with pressure washers, with the maximum pressure bar at 60. In the treatment of hardwoods, the process must be repeated in order to achieve a higher quantity of hardwoods. Depending on the types of wood, the lightening result may differ slightly. After washing with water, the wood will be perfectly dry usually after 2-3 days' duration. It is possible to then paint the product if needed.

Sizes: 0.75ml, 5 L

Store above 5°C

Apply above 10°C

Ready to use

Brush and spray

Yeild 10 m2/l

Mix well before use

Drying time, 10 minutes.
