

## MULTI SURFACE PAINT

MSP the iconic and original multi surface, interior exterior, self priming\* and self undercoating paint. Produced for over 25 years in our UK factory. This unique and innovative product has stood the test of time. Class 0 fire rated.

*MSP is a registered trade mark of Bedec Products Ltd.*

Coverage: Approximately 13-15m<sup>2</sup> per litre, depending on substrate porosity and application method.  
Available in 750ml and 2.5 litres (all colours)  
250ml, 5 litres and 20 litres (selected colours)

## ACRYLIC EXTERIOR BARN PAINT

FOR BARN, STABLES, OUTBUILDINGS, SHEDS & FENCING

The original Barn Paint, initially formulated for restoration work on Essex barns. However our customers have over the years found Bedec Barn Paint to perform successfully on many substrates around farms, gardens factories and even houses. It also exhibits the unique multi-surface, self priming\* and self undercoating properties.

Coverage: Approx. 13-15 m<sup>2</sup> per litre per coat depending upon substrate texture, porosity and application method.  
Available in 2.5 litres, 5 litres and 20 litres

## ACRYLIC FLOOR PAINT

Acrylic Floor Paint affords the complete solution for interior commercial and domestic floor needs and is suitable for use on wood and concrete. It contains a fine aggregate to help provide slip resistance. The final coat should be allowed to dry for at least 16-24 hours before the floor is returned to full use. Do not use where prolonged contact with wet or soft compound vehicle tyres can occur.

Coverage: approx 8-12m<sup>2</sup> per litre for each coat  
Available in 1 litre, 2.5 litres, 5 litres and 20 litres

## Elastomeric Coatings

A unique range of products formulated to form seamless flexible coatings which flex and stretch with the substrate.

## EXTRA - FLEX ELASTOMERIC MASONRY PAINT

Extra-Flex is a premium quality smooth masonry paint which provides a professional finish with outstanding protection. Designed to fill and bridge hair line cracks and can stretch up to 400% as well as being an anti carbonation coating.

Coverage: approx 8-12m<sup>2</sup> per litre for each coat  
Available in 5 litres

## INTERIOR-FLEX ELASTOMERIC EMULSION PAINT

Interior-Flex is a flexible matt emulsion ideal for interior walls and ceilings where hairline cracks need to be filled and bridged.

Coverage: approx. 8-12m<sup>2</sup> per litre for each coat  
Available in 2.5 litres and 5 litres

Super-Flex is ideal for roofs and walls and economically prevents or cures all types of leaking roof, gutters and walls.

Coverage: no more than 2m<sup>2</sup> per litre on roofs / 8m<sup>2</sup> per litre on walls  
Available in 2.5 litres, 5 litres and 20 litres

## General Information

All of our products are water-based and therefore should only be applied at air and surface temperatures above 8°C and protected from frost. Do not apply when foggy or likely to rain before the paint has dried. It is essential when using these unique products that all surfaces are free from oil, grease, dirt, dust and loose particles. On existing painted surfaces remove all loose and flaking paint and thoroughly rub down with abrasive paper. Areas affected by mould, lichen, algae or moss should be treated with a suitable fungicidal wash.

All our products are normally touch dry in 2 hours and re-coatable after 4 hours (18°C 65% RH). Super-Flex due to thicker film is re-coatable after 4-6 hours.

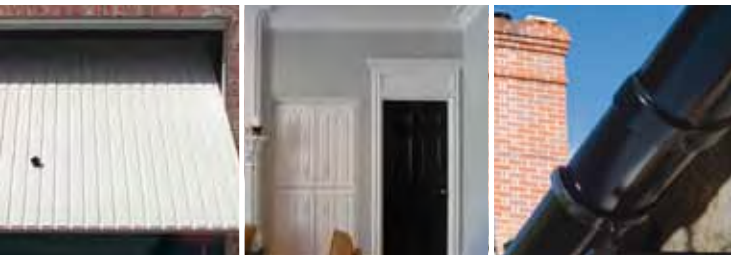

Pressure treated timber should be weathered for 6 months. Do not apply to substrates that have had water repellent treatments. Denatured wood should be abraded to reveal new cells. Any new planed wood should be abraded to allow maximum penetration. On untreated, weathered wood, new wood, cement render, plaster, brick work or any porous substrate the first coat should be thinned with 30-40% clean water to act as a primer coat. \*Prime steel or metal surfaces liable to rust with a suitable metal primer.

Some surfaces are liable to have water solubles which can cause staining, especially with white and lighter colours. Substrates to be careful of are some plywoods, red cedarwood, very resinous timber or damp walls. Knots and areas liable to staining, should be sealed with Bedec Stain Block.

All of our products can be applied by brush, roller and spray. For spraying use airless or HVLP.

For full application and preparation details refer to our can instructions and Technical Data Sheets.
